

PC Environmental are proud to present
Spark™ Range of Dosimeters
From Larson Davis

The Spark™ 706 personal noise dosimeter makes workplace noise exposure measurements more convenient and cost-effective than ever before. Combining a full range of advanced features with an ergonomic design, the ultra-compact 706 is well accepted by workers in addition to Industrial Hygiene and Safety professionals everywhere. Constructed in a tough yet lightweight housing similar to that of a cellular phone, Spark™ dosimeters are certified as intrinsically safe for rugged, “go-anywhere” use. The 706’s bold, graphical LCD display provides back lighting on demand for high visibility in any environment, and operator prompts are displayed in “plain English” - for fast, easy setup and simple control. With multiple simultaneous dose calculations, ceiling and peak level displays, as well as

continuous data logging, the 706 computes compliance results for any standard, present or proposed - and with quick IR download using Blaze™ software, a selection of concise, easily understood reports and colour graphs are created for your review.

All Spark™ dosimeters deliver an incredible battery life of over 100 hours continuous use on just two AA alkaline cells - saving money and maximizing your sampling time. And, with available ‘I2CU’*, multiple dosimeter data retrieval is made fast and easy. These advanced new capabilities join together with a modest price to make the Spark 706 a superior value for practitioners of occupational noise monitoring programs.

*I2CU - Interactive Infrared
